June, 2008

To Whom It May Concern:

This letter is to commend EI Associates with regard to the services rendered during the installation of a synthetic surface soccer field at the Hasbrouck Heights Middle/High School. EI competently and efficiently provided engineering, bidding, construction management, and closeout services. Their professionalism and expertise were evident throughout the duration of the project.

The project was completed in 2003 and has been problem free to date. The drainage is excellent and has allowed interscholastic play to begin within an hour of severe rain storms. The field is in constant use from early spring to late fall by the school district's athletic department as well as municipal and community youth programs. It has held up extremely well and has become a source of pride for the board of education as well as local youth sports organizations.

I recommend EI Associates without hesitation to anyone who is considering a project of this type. Feel free to contact me if you have any questions or need additional information regarding this matter.

Sincerely,

*Joseph T. Bellino*
