RE: Maywood Boiler Project
EIA Project No. EP 5371.01

Mr. Richard F. Basta, Senior VP
EI Associates
8 Ridgedale Ave.
Cedar Knolls, NJ 07927

Mr. Richard Basta :

Stepan facing the tough challenge of replacing aged boilers, turned to EI Associates for experience in the civil and structural engineering disciplines. Use of existing facilities to minimize capital cost posed numerous challenges. EI Associates rose to the challenge and came up with innovated solutions in a timely manner. Communication between principles was key in putting the project efforts on track. Good job. Project time lines were met due in major part to the efforts of Michelle Feigelis.

I will recommend EI Associates as a resource for future project endeavors at Stepan's New Jersey facilities.

Yours truly,

G.M. Shipley
Corporate Engineer

CC: Michelle Feigelis , Project Manager ; Frank Swetits, Senior Account Executive
